

Placement Cell

During the academic session 2024–25, the Placement Cell actively worked to enhance the employability and professional readiness of students. A series of extension lectures and training sessions were organized, focusing on interview skills, personality development, and domain-specific knowledge across various areas. These initiatives were aimed at equipping students with the confidence and competence required to face competitive recruitment processes.

In addition, the Placement Cell successfully organized placement drives, providing students with opportunities to interact with recruiters and secure positions in reputed organizations. **A placement drive in collaboration with NIIT for Axis Bank was conducted on 8th March 2025, in which 20 students were shortlisted.** In total more than 100 students were placed in public and private sector. Furthermore, the Cell signed an MoU with TimesPro Institute (a Times of India Group company) to strengthen training and placement activities for students. Through these efforts, the Cell continued its commitment to bridging the gap between academic learning and industry expectations, thereby preparing students for successful careers
